Locket No. 50-458

Gulf States Utilities Company
ATTN: Mr. William J. Cahill, Jr.
Senior Vice President -
River Bend Nuclear Group
P.O. Box 2951
Beaumont, TX 77704

Gentlemen:

SUBJECT: INTEGRATED DESIGN INSPECTION 50-458/84-18, SUPPLEMENT 1

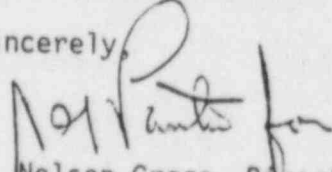

This letter conveys the results and conclusions of a follow-up inspection to the Integrated Design Inspection conducted at the Stone and Webster Cherry Hill Operations Center from November 19-21, 1984. The inspection was conducted by the NRC's Office of Inspection and Enforcement. The team was composed of personnel from the NRC's Office of Inspection and Enforcement, Office of Nuclear Reactor Regulation, and consultants. The purpose of this inspection was to assess the adequacy and status of your actions regarding the Integrated Design Inspection Report issued on August 29, 1984.

Your letter dated October 26, 1984, in response to the Integrated Design Inspection Report, indicated that you planned to address certain items in a supplemental response. During the follow-up inspection, you agreed that the supplemental response would also provide information regarding other items, as noted in the enclosed supplement to the Integrated Design Inspection Report.

Responses to Integrated Design Inspection items not included in the enclosure and not requiring an additional response have also been reviewed by the NRC. We consider your responses for those items to be acceptable without further review.

In accordance with 10 CFR 2.790(a), a copy of this letter, its enclosure, and your reply will be placed in the NRC's Public Document Room.

Sincerely,

J. Nelson Grace, Director
Division of Quality Assurance, Safeguards,
and Inspection Programs
Office of Inspection and Enforcement
