Raleigh, NC 27602

Gentlemen:

SUBJECT: REPORT NO. 50-261/84-31

On August 9-10, 1984, NRC inspected activities authorized by NRC Operating License No. DPR-23 for your H. B. Robinson facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The violation described in the enclosed report is a second example of the violation pertaining to improper controls over entry to a locked high radiation area contained in a Notice of Violation and proposed imposition of Civil Penalty sent to you with our letter dated March 13, 1984. Your response dated May 23, 1984, described immediate corrective action to be completed by September 1, 1984. Subsequent to the July 28, 1984, event, additional interim corrective actions were discussed in a telephone conversation on August 3, 1984, between Mr. D. M. Verrelli, Region II, and Mr. G. P. Beatty, Jr., and were documented in CP&L's letter dated August 3, 1984. It is our understanding that all corrective actions necessary to preclude recurrence of such violations will be complete and implemented by September 1, 1984. Please inform this office immediately if your understanding of this matter is different from that stated above.

In accordance with 10 CFR 2.790(a), a copy of this letter and enclosures will be placed in the NRC Public Document Room unless you notify this office by telephone within 10 days of the date of this letter and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
