Subject: Limerick Generating Station, Units 1 and 2  
1992 Annual Emergency Exercise Scenario Package

Dear Sirs:

Attached is the Limerick Generating Station (LGS) 1992 Annual Emergency Exercise scenario package for NRC review. This scenario package is being submitted 60 days prior to the scheduled November 24, 1992 annual exercise in accordance with an NRC letter dated August 9, 1989. This will be a partial participation exercise and will not involve any offsite participation. Due to the confidentiality of this information, copies of the attached scenario package are only being distributed to those individuals specified as recipients in the NRC letter dated August 9, 1989. However, per a telephone conversation between Craig Conklin, NRC Region 1, and Craig L. Adams, Manager, Emergency Preparedness Section, on Tuesday, September 22, 1992 at approximately 10 A.M., the scenario package for the Limerick Emergency Exercise scheduled for November 24, 1992 need not be sent to J. Jamison who is identified in the August 9, 1989 letter as a recipient of the scenario package.

The attached scenario package provides the scenario objectives, schedules, exercise rules, and controller contingency and simulation information. This package also contains data relating to plant conditions, radiation levels and release rates, and samples of the data to be presented.

As stated in our letter dated August 21, 1992, Mr. Craig L. Adams, Manager, Emergency Preparedness Section, has been designated as our interface with the NRC for this emergency exercise. Please forward correspondence concerning this exercise to him at the address below.
