Docket No. 50-451

Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Subject: Clinton Power Station Submittal
of the Updated Safety Analysis Report,
Revision 4

Dear Sir:

Pursuant to 10CFR50.71(e), Illinois Power Company (IP) hereby submits one signed original and ten copies of Revision 4 to the Clinton Power Station Updated Safety Analysis Report (USAR).

In accordance with 10CFR50.71(e) (2) (ii), the attached Clinton Power Station 10CFR50.59 Report identifies all safety evaluations for implemented changes affecting the USAI for the period of May 15, 1991 through May 15, 1992. These safety evaluations were performed by IP under the provisions of 10CFR50.59, and have not been previously submitted to the Nuclear Regulatory Commission (NRC). As a result of the evaluations, it was determined that an unreviewed safety question did not exist.

I certify that the information given in the attached USAR revision accurately presents changes made since the previous submittal and analyses submitted to the Commission or prepared pursuant to Commission requirement.

Sincerely yours,

J. S. Perry
Senior Vice President
