In the Matter of
DUKE POWER COMPANY, ET AL.
(Catawba Nuclear Station, Units 1 and 2)
Docket Nos. 50-413 and 50-414

Dear Sirs:

During the course of the recent hearing a number of documents obtained in discovery by Palmetto Alliance from Applicants and the NRC Staff were identified and offered in evidence by Palmetto although some were not assigned exhibit numbers or submitted for the record at that time. Leave was granted, without objection, for our later assignment of exhibit numbers and submission of these documents for the record. We make such assignments and submissions at this time.

On the attached listing of Palmetto and CESC Exhibits those numbered 152 and following are newly numbered. Palmetto Exhibit No. 146 (FOIA 84-722, NRC Region II "welder B" case file) is to be reproduced and transmitted by the NRC Staff. This Exhibit was identified and offered at Tr. 13,792, and admitted as No. 146, without objection at Tr. 13,926. It is mis-indexed as "Table I" on the Index page of the transcript for Thursday, October 11, 1984. A Table I to Mr. Ferdon's July 16, 1984, Memo, entitled "Summary of Reported PWR IGSCC Events" was, in fact, admitted as a part of the Memo to which it was attached, Tr. 13,924, which was admitted as Staff Exhibit No. 30, Tr. 13,624.

All of these documents have previously been circulated to the Board and parties. A set of these Palmetto/ CESC Exhibits (except No. 146) is enclosed for the convenience of the Chairman. By copy
