WAIVER OF CONSTRUCTION PERMIT APPLICATION FEE FOR WASHINGTON  
PUBLIC POWER SUPPLY SYSTEM (WPPSS) UNIT WNP-4

The Directorate of Licensing has requested waiver of the construction permit application fee for the relocation of site for WNP-1 and the addition of the identical unit WNP-4 based on Licensing's study of Regulatory's review effort that was related solely to the original site and could not be used in the review of the new site and duplicate plant (WNP-4).

Licensing has determined that about 526 man-hours were spent reviewing WNP-1 PSAR material that was later modified or superseded because of site relocation. Licensing has concluded that all of the time expended on WNP-1 except for about 260 man-hours, are directly applicable to the amended application. Consequently, about \$11,000 would be lost if only one application fee is collected.

The Commission has collected an application fee of \$70,000 for WNP-1 and will collect a full construction permit fee for one of the units covered by the application and a reduced fee for the second or duplicate unit.

Waiver of the fee falls within the provisions of §170.11(b), which provides that the Commission may, upon its own initiative, grant such exemptions from the requirements of this part as it determines are authorized by law and are otherwise in the public interest.

Accordingly the second construction permit application fee for the amended application which covered the site relocation and duplicate unit is waived.
