

APR 13 1984

MEMORANDUM FOR: Files

FROM: William O. Miller, Chief, License Fee Management Branch, ADM

SUBJECT: MAIVER OF FEE FOR LICENSE 29-13848-01, AMENDMENT NO. 15

License Number 29-13848-01, Amendment No. 15, was issued March 30, 1984. The amendment was issued in response to the licensee's letter dated March 16, 1984, which transmitted a close-out survey report for the Front Building Complex. By memo dated March 30, 1984, copy attached, the Region I Licensing staff informed us that the building was not used for purposes listed on the license and was not explicitly described on the license. Region I further stated that the issuance of an amendment to document the fact that the building was not contaminated and could be released for unrestricted use would be in NRC's interest because of two outstanding orders requiring the licensee to suspend use of licensed materials and decontaminate their facilities.

Since a license amendment was not necessarily required, and since the issuance of the amendment was in the interest of the NRC, the fee for Amendment No. 15 is hereby waived.

Original Signed by
Wm. O. Miller
