Gentlemen:

SUBJECT: NRC INSPECTION REPORT 50-445/92-33; 50-446/92-33
(NOTICE OF VIOLATION)

This refers to the inspection conducted by Messrs. R. B. Vickrey and C. J. Paulk of this office on September 8-10, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report. At that exit meeting, the inspectors identified an unresolved item relating to the identification of deficiencies on Unit 2 safety-related instrument transmitters. On September 30, 1992, a followup exit was conducted via telephone with Mr. R. Walker and other members of your staff and they were informed that we had concluded that a violation had occurred regarding a failure to properly implement procedures related to corrective action.

Areas examined during the inspection are identified in the report. These included instrument component and system procedure review, work observation, and record reviews related to installed instrumentation at Comanche Peak Steam Electric Station, Unit 2.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation is of concern because the failure to follow the procedures for identifying deficiencies on Unit 2 could have an impact on the safe operation of Unit 1.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future

inspections the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

The responses directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96.511.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
