MEMORANDUM FOR: Thomas M. Novak, Assistant Director  
for Licensing  
Division of Licensing

FROM: Dennis M. Crutchfield, Assistant Director  
for Safety Assessment  
Division of Licensing

SUBJECT: APPENDIX A TECHNICAL SPECIFICATIONS FOR LIMERICK UNIT 1  
OPERATING LICENSE

The subject Technical Specifications are enclosed for incorporation in the Limerick Unit 1 operating license.

The Limerick Technical Specifications were developed utilizing Revision 3 to NUREG-0123, "Standard Technical Specifications for General Electric Boiling Water Reactors," as a basis. They reflect design differences and new regulatory requirements not already incorporated in these Standard Technical Specifications.

The Proof and Review version of the Limerick Technical Specifications were provided to the appropriate NRC technical review branches and to the applicant for review. Written responses have been received from all review branches, Region I and the applicant and applicable comments have been incorporated.

These Technical Specifications were also provided to the applicant for review in final draft form. The subject Technical Specifications have been certified by the applicant to accurately reflect the as-built plant, FSAR as supplemented, and SER. No changes should be made to these Technical Specifications prior to their issuance as part of the operating license without our written approval.

If you have any questions or if we can be of further assistance, please contact Donald R. Hoffman (x28518) of the Standardization and Special Projects Branch.
