In the Matter of  
NORTHEAST NUCLEAR ENERGY COMPANY  
(Millstone Nuclear Power Station, Unit No. 2)  
Docket Nos. 50-336-OLA)  
(ASLBP No. 92-665-02-OLA)  
(Spent Fuel Pool Design)

Dear Ms. Marucci:

This will confirm our conversation of October 6, 1992. As I stated, any requests your group may have for information held by the NRC Staff relating to Millstone 2's spent fuel pool, which is the subject of the pending proceeding before a panel of the Atomic Safety and Licensing Board, should be directed to counsel of record for the NRC Staff in the proceeding. The NRC would not anticipate taking any action on any such requests for information until after the Licensing Board determines the need for any discovery and establishes a schedule, pursuant to its Order dated October 1, 1992.

Any information in the Public Document Room, of course, remains available for your review.

Sincerely,

John T. Hull  
Counsel for NRC Staff
