Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Byron Generating Station Units 1 and 2
Braidwood Generating Station Units 1 and 2
Post Accident Sampling System
NRC Docket Nos. 50-454/455/456/457

Reference (a): D. H. Smith letter to H. R. Denton
dated October 15, 1984

Dear Mr. Denton:

This is to clarify the intent of Attachment 7 to Reference (a). Regarding the Containment High Range Radiation Monitors at Byron, we are requesting a waiver from the factory calibration requirements in NUREG 0737 on the basis that the calibration described in Attachment 7 is an acceptable alternative. We were not addressing any change to "In Situ" calibration.

Please address further questions regarding this matter to this office. One signed original and fifteen copies of this letter are provided for NRC Review.

Very truly yours,

David H. Smith
Nuclear Licensing Administrator
