Docket No. 50-288

The Reed Institute
Reed College
ATTN: Professor Arthur F. Scott
Director - Reed Reactor
Portland, Oregon 97202

Gentlemen:

Change No. 2
License No. R-112

By letter dated August 2, 1972, you requested two changes in the Technical Specifications and an amendment to Facility License No. R-112. The Technical Specification changes would clarify responsibilities of the Radiation Safety Committee and the Reactor Operations Committee. The license amendment would modify record keeping requirements. The records described in your request should be retained for a five-year period.

During our review of your requests, we found that certain modifications were necessary to meet current regulatory requirements. These modifications have been discussed with your staff.

We have reviewed the above requests, as modified, and we have concluded that operation in the manner proposed will not present significant hazards considerations different from those previously evaluated and that there is reasonable assurance that the health and safety of the public will not be endangered. Accordingly, pursuant to Section 50.59 of 10 CFR Part 50, the Technical Specifications of Facility License No. R-112 are hereby changed as shown in Attachment A to this letter and Facility License No. R-112 is amended as shown in Amendment No. 1.

Sincerely,

Donald G. Skovholt
Assistant Director
for Operating Reactors
Directorate of Licensing

ATTACHMENT A

CHANGE NO. 2 TO THE TECHNICAL SPECIFICATIONS

LICENSE NO. R-112

THE REED INSTITUTE (REED COLLEGE)

DOCKET NO. 50-288

1. Section 1, change paragraphs 2 and 3 as follows:

- I-2. Change last sentence to read:

"It shall meet at least twice yearly to review safety aspects of facility operations."

- I-3. Change second sentence to read:

"It shall review facility operations at least twice yearly and shall meet as required to review all questions of safety of operation and scheduling of work of a non-routine nature."

2. Add the following section:

K. Plant Operating Records

In addition to the requirements of applicable regulations and in no way substituting therefor, records and logs of the following items, as a minimum, shall be kept in a manner convenient for review and shall be retained as indicated:

1. Records to be retained for a period of at least five (5) years:
 - (a) reactor operations, including unscheduled shutdowns;
 - (b) principal maintenance activities and the reasons therefor;
 - (c) shipments of radioactive materials;

- (d) equipment and components surveillance activities;
 - (e) experiments performed with the reactor.
2. Records to be retained for the life of the facility:
- (a) gaseous and liquid radioactive waste released to the environs;
 - (b) off-site environmental monitoring surveys;
 - (c) facility radiation and contamination surveys;
 - (d) fuel inventories and transfers;
 - (e) updated, corrected and as-built facility drawings.
