Steam Generator Surveillance
Technical Specification Change Request

Gentlemen:

In our letter 1CAN088404 dated August 13, 1984, we submitted the proprietary version of BAW-1823 "Once Through Steam Generator Mechanical Sleeve Qualification". This report was submitted in support of a Technical Specification change to allow the sleeving of 10 steam generator tubes as part of a demonstration program. Recently, B&W has developed a non-proprietary version of this same document which we have attached for your use.

Very truly yours,

J. Ted Enos
Manager, Licensing
