Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Byron Generating Station Units 1 and 2  
Braidwood Generating Station Units 1 and 2  
Mechanical Equipment Qualification  
NRC Docket Nos. 50-454/455 and 50-456/457

Reference (a): July 3, 1984 letter from T. R. Tramm to  
H. R. Denton.

Dear Mr. Denton:

This letter provides additional information regarding the environmental qualification of mechanical equipment for Byron and Braidwood stations. NRC review of this information is necessary to close Outstanding Item 7 of the Byron SER.

In Attachment 3 to reference (a) we indicated that the air diaphragms on the pressurizer PORV's would be replaced because complete environmental qualification of the installed diaphragms could not be established. At the request of the NRC Staff, we have confirmed that those diaphragms have been replaced on Byron 1.

Please address further questions regarding this matter to this office.

Very truly yours,

T. R. Tramm  
Nuclear Licensing Administrator
