Subject: License Amendment Request 92-04: Proposed Revision to the Requirement for the Operations Manager to Maintain a Senior Reactor Operator License

Gentlemen:

North Atlantic Energy Service Corporation (North Atlantic) has enclosed License Amendment Request 92-04. This License Amendment Request is submitted pursuant to 10CFR50.90 and is distributed pursuant to 10CFR50.4.

This License Amendment Request proposes changes to the Seabrook Station Technical Specifications to revise the current requirement for the Operations Manager to hold a senior reactor operator license. The proposed Technical Specification will require the Operations Manager to either hold or have held a senior reactor operator license at Seabrook Station. The requirement for the Assistant Operations Manager to maintain a senior reactor operator license would remain unchanged. This proposed change will enhance the effective operation of the facility by enabling the Operations Manager to devote more attention to the managerial responsibilities of his position and to ensuring that the Station is operated safely and in accordance with the requirements of the Seabrook Station Operating License.

License Amendment Request 92-04 has been reviewed and approved by the Station Operation Review Committee and the Nuclear Safety Audit Review Committee.

As discussed in the enclosed License Amendment Request, Section V, the proposed changes have been determined not to involve a significant hazards consideration pursuant to the standards of 10CFR50.92. A copy of this letter and the enclosed License Amendment Request have been forwarded to the State of New Hampshire State Liaison Officer pursuant to 10CFR50.91(b).

North Atlantic requests NRC review of License Amendment Request 92-04 and issuance of a license amendment by April 30, 1993 (see enclosed License Amendment Request, Section VI).
