Docket Nos. 50-352  
50-353

Mr. D. M. Smith  
Senior Vice President -  
Nuclear  
Philadelphia Electric Company  
Nuclear Group Headquarters  
Correspondence Control Desk  
P. O. Box 195  
Wayne, PA 19087-0195

Dear Mr. Smith:

Subject: Federal Emergency Management Agency (FEMA) Post-Exercise Assessment for  
the Limerick Generating Station March 1991 Full-Participation Exercise

Enclosed is a letter from Mr. D. H. Kwiatkowski, Assistant Associate Director, Office of  
Technological Hazards, FEMA, dated April 24, 1992, together with the subject report prepared  
by FEMA Region III.

There was one deficiency identified during the exercise, due to Spring City Borough's failure  
to participate. This deficiency was corrected via a remedial exercise held on May 1, 1991.  
Based on the results of the March 26, 1991 exercise and the May 1, 1991 remedial exercise, the  
offsite radiological emergency preparedness for the Limerick Generating Station is adequate to  
provide reasonable assurance that appropriate measures can be taken to protect the health and  
safety of the public in the event of a radiological emergency. However, the report identifies 43  
Areas Requiring Corrective Action (ARCAs). We request that your staff follow up with offsite  
officials to resolve the identified ARCAs prior to the next full-participation exercise.
