Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Crystal River Unit 3
Docket No. 50-302
Operating License No. DPR-72
Final Safety Analysis Report, Section 1.7, Revision 5
Quality Program Description

Dear Sir:

Florida Power Corporation (FPC) submitted its Quality Program description for the operational phase of Crystal River Unit 3 by letter 3F-0683-01 dated June 10, 1983. Subsequent discussion between NRC and FPC personnel resulted in approval of the Quality Program description changes. Additional evaluations of Quality Program description changes which do not involve a reduction in commitment are included in this update. To preclude confusion, the revised Quality Program description has been incorporated as Revision 5 to the Final Safety Analysis Report (FSAR) Section 1.7.

Florida Power Corporation hereby submits one signed original and twelve (12) copies of the revised Quality Program description for Crystal River Unit 3. In compliance with 10 CFR 50.71(e), Revision 6 to the FSAR will be submitted on or before July 1, 1985.

Sincerely,

G. R. Westafer
Manager, Nuclear Operations
Licensing and Fuel Management

GJF/feb
