Mr. B. J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION
DOCKET NOS. 50-445 AND 50-446
SER (JULY 1981) SECTION 13.2.2;
LICENSED OPERATOR TRAINING PROGRAM

Dear Mr. Youngblood:

Section 13.2.2 of the CPSES SER dated July 1981 discusses the training program for licensed operators. Since the issuance of this SER, a CPSES training program description was transmitted to the NRC on August 23, 1983. Approval for this program was received by NRC letter dated February 3, 1984.

The SER has not been revised to reflect the current CPSES training program as approved. It is requested that the evaluation be updated in a future SER supplement. In particular, reference is made to an annual review of licensed operators, maintenance and technical personnel using position task analyses (SER page 13-20). This review has never been contemplated by CPSES and the term "position task analyses" is not clearly defined for CPSES. It is also requested that this discrepancy be corrected in a future supplement to the SER.

Sincerely,

John W. Beck
Manager, Licensing
