Mr. Richard P. Crouse
 Vice President, Nuclear
 Toledo Edison Company
 Edison Plaza - Stop 712
 300 Madison Avenue
 Toledo, Ohio 43652

Dear Mr. Crouse:

Subject: Environmental Qualification of Electrical Equipment
 Important to Safety

The staff has completed its evaluation of environmental qualification of electrical equipment important to safety and has prepared the enclosed Safety Evaluation Report (SER). This SER addresses Toledo Edison Company's compliance with the requirements of 10 CFR 50.49, proposed resolution for the deficiencies identified in our SER dated February 8, 1983 and Franklin Research Center Technical Evaluation Report dated January 11, 1983, and justifications for continued operation.

Based upon the December 13, 1983 meeting between Toledo Edison Company representatives and the NRC staff and our review of Toledo Edison Company letter dated April 3, 1984 documenting these discussions, we have concluded that Toledo Edison Company's Equipment Qualification Program is in compliance with the requirements of 10 CFR 50.49, that the proposed resolution for each of the environmental qualification deficiencies identified for Davis Besse Unit 1 is acceptable, and that continued operation of the Davis Besse Nuclear Power Station, Unit No. 1 will not present undue risk to the public health and safety.

Sincerely,

*ORIGINAL SIGNED BY
JOHN F. STOLZ*

John F. Stolz, Chief
 Operating Reactors Branch #4
 Division of Licensing
