Mr. Robert D. Martin, Regional Administrator  
U. S. Nuclear Regulatory Commission  
Region IV, Office of Inspection and Enforcement  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

Dear Mr. Martin:

River Bend Station Unit 1  
Docket No. 50-458  
Final Report/DR-179

Gulf States Utilities Company (GSU) has completed its evaluation of DR-179 concerning test loop diagrams that were not updated to agree with the latest approved design documents prior to testing control circuitry identified on 11 loop calibration reports (LCRs). This condition did not invalidate any previous testing and no retesting was required. GSU has therefore determined this condition does not meet the reporting requirements of 10CFR50.55(e). The 11 LCRs were revised to incorporate the latest design documents.

Sincerely,

*for* J. E. Booker  
Manager-Engineering,  
Nuclear Fuels & Licensing  
River Bend Nuclear Group
