Subject: LEAK TESTING OF POLONIUM-BERYLLIUM SOURCES

Dear Mr. Winston:

Thank you for your letter of December 9, 1955 in which you describe in detail the method used for leak testing your Polonium-Beryllium sources.

This appears to be a satisfactory arrangement for monitoring these sources for leakage of Polonium.

Very truly yours,

Robert F. Barker
Senior Regional Field Representative
Radiological Safety Branch
Isotopes Division
