Post Office Box 2175
Houston, Texas

Subject: DISPOSAL OF RADIOACTIVE WASTE MATERIAL

Dear Mr. Stratton:

Reference is made to your letter of February 20 regarding disposal of expended polonium-beryllium neutron sources. There are several commercial firms which are licensed for waste disposal. We are enclosing our reprint entitled "Suppliers of Isotope Materials and Services", and the waste disposal agencies are coded by the letter "d".

You may also dispose of these sources by returning them to the supplier from whom you obtained them. Oak Ridge National Laboratory also maintains a waste disposal service. You should contact any of these agencies directly for information regarding their services.

Very truly yours,

for: Cecil R. Buchanan, Assistant Chief
Hyproduct Licensing Branch
Isotopes Extension
Division of Civilian Application

Encl.: Suppliers of Isotopes Materials and Services

Call to GNE from GNS and JMM. Call was made to GNS regarding Schlumberger Well Surveying Corp., Houston, Texas, License No.s 42-90-1, 2, 3 and 4. GNS questioned whether or not they had definitely agreed during their meeting with Schlumberger representatives on Marys Bl (see previous phone log) to issue a new license to this group. GNE stated that they had since the Company was now incorporated in Texas instead of Oklahoma. However, it may be possible merely to issue License No. 3 consolidating all licenses instead of assigning a new institutional number. Reference is made, however, to phone call from GNS to Schlumberger on 3-5-57 wherein they were informed that new license numbers would not be issued. To clarify this matter and to determine whether there are other licensing problems GNS may have to call Schlumberger. Schlumberger also has an additional site in Ridgely, Tenn., to which two licenses, Nos. 6-87-1 and 2 have been issued. Will it be necessary to assign new numbers to this group also?
