Subject: Request for Deferral of Miscellaneous Licensing Matters during  
Construction Shutdown

Dear Mr. Cook:

Your letter of September 11, 1984 requested NRC approval to defer three require-  
ments until such time, if ever, as the Midland Plant is restarted. Our response  
to these same-numbered items follows:

1. Regarding your request to defer the requirements of Amendment 1 to the construction permits which direct Consumers Power Company to submit certain quality assurance information established by ALAB-106, NRC consideration of construction permit amendments is subject to a filing pursuant to 10 CFR 50.90. Pending receipt of such a filing, NRC can take no action regarding this request.
2. Your request to defer the completion of the independent design and construction verification program is approved.
3. Regarding your request for blanket approval to defer any action required by NRC Bulletins, Information Notices and Generic Letters not related to Midland shutdown activities, we note that Information Notices do not require action. With respect to Bulletins and Generic Letters, such required actions typically vary in significance to safety, need for timely reply or implementation, and relationship to ongoing construction. The staff will consider such requests to defer action on a case-by-case basis.

Sincerely,

Darrell G. Eisenhut, Director  
Division of Licensing
