Mr. D.R. Hunter, Chief Reactor Project Branch 2 U.S. Nuclear Regulatory Commission Office of Inspection & Enforcement 611 Ryan Plaza Drive, Suite 1000 Arlington, TX 76012

Docket No.: 50-445

COMANCHE PEAK STEAM ELECTRIC STATION CABLE SPREAD ROOM: FIRE PROTECTION QA FILE: CP-85-02, SDAR-162 FILE NO.: 10110

Dear Mr. Hunter:

On January 11, 1985 we verbally notified your Mr. D. Hunnicutt of a deficiency identified during an engineering review of fire protection construction/installation activities. The slab at Elevation 821'-8" in the Turbine Building was identified to be four (4) inches in thickness which is not adequate to provide a three-hour fire barrier.

We have completed our investigation and concluded that the matter is not reportable under 10CFR50.55(e). Records supporting this determination are available for your inspector's review at the CPSES site.

Very truly yours,

Bulgecliment
