Dallas, Texas 75201-3411

SUBJECT: NRC INSPECTION REPORT 50-445/96-01; 50-446/96-01

This refers to the inspection conducted by A. T. Gody, Jr., H. A. Freeman, and V. L. Ordaz-Purkey of this office on January 7 through February 17, 1996, at the Comanche Peak Steam Electric Station, Units 1 and 2, facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The events surrounding the 2 turbine runbacks on Unit 2 on February 14 remain unresolved pending further NRC review of the causes and the power history.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

J. E. Dyer, Director  
Division of Reactor Projects
