50-278

Dr. Thomas E. Murley, Administrator  
U.S. Nuclear Regulatory Commission  
Region I  
Office of Inspection and Enforcement  
631 Park Avenue  
King of Prussia, PA 19406

SUBJECT: QA Program Description Changes in FSAR for Peach Bottom Atomic Power  
Station, Units 2 and 3

Dear Dr. Murley:

Enclosed is Philadelphia Electric Company's Peach Bottom Atomic Power  
Station, Units 2 and 3, Quality Assurance Program Description as of, at least,  
January 1984.

We have been advised by G. Napuda, Lead Reactor Engineer, Region I, that the  
updated Quality Assurance Program description should also be submitted to Region  
I pursuant to 10CFR50.54(a)(3) even though the changes to the Quality Assurance  
Program description do not reduce commitments in the program description  
previously accepted by the NRC.

Changes made to the Quality Assurance Program description previously  
submitted to the NRC are identified by a bar in the left hand margin. It has  
been determined that these changes to the QA Program description do not reduce  
the commitments in the program description previously accepted by the NRC.

Q002  
1/1

A copy of this QA Program description was previously submitted to the NRC in accordance with the requirements of 10CFR50.71(e).

Very truly yours,

S. L. Baltroff  
Vice President  
Electric Production
