Docket No. 50-293

Proposed Change to Fire Protection
Technical Specification (Halon System)

Dear Sir:

On August 9, 1984, Boston Edison Company (BECO) submitted the proposed change in Technical Specifications concerning a Halon system which replaces the CO₂ system in the Cable Spreading Room at Pilgrim Station.

As a result of subsequent conversations with Paul H. Leech and John Stang of your staff, on October 9 and 12, 1984, minor changes were recommended and agreed upon by your representatives and Boston Edison fire protection personnel.

These changes are reflected in the enclosed copy of the Halon system Technical Specification LCO and Bases.

Very truly yours,

W.D. Harrington

ERM/ns

Enclosure

Commonwealth of Massachusetts)
County of Suffolk)

Then personally appeared before me W. D. Harrington, who, being duly sworn, did state that he is Senior Vice President - Nuclear of the Boston Edison Company, the applicant herein, and that he is duly authorized to execute and file the submittal contained herein in the name and on behalf of the Boston Edison Company and that the statements in said submittal are true to the best of his knowledge and belief.

My Commission expires: 4-14-89

Marian M. Elony
