Mr. Boyce H. Grier, Director
Office of Inspection and Enforcement
United States Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, Pennsylvania 19406

Dear Mr. Grier:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Health Physics Organization

This letter is intended to update and revise the Oyster Creek Nuclear Generating Station Health Physics organization that was originally discussed in my memo to you dated August 9, 1978. The realignment of the Health Physics group is based on recommendations of our consultant and are a part of our Health Physics Program changes.

The proposed organization is attached for your information. Adjacent to each supervisory title is a list of some of the major responsibilities for which that position is accountable and is consistent with the program changes currently being implemented.

This arrangement provides the Supervisor-Health Physics (Radiation Protection Manager in Regulatory Guide 8.8, Rev. 3) close contact with the Group Health Physics Supervisor responsible for the day-to-day in-plant worker oriented portion of our program. Also, in order to permit the Supervisor-Health Physics to be relieved of some past responsibilities, off-site emergency planning and coordination will be provided by our home office staff, and Health Physics training responsibilities will be assumed by the station training group with appropriate assignment of personnel to the training group to accomplish this function.

Finally, in order to ensure continued senior management attention to the station's Health Physics Program, a communication path is formally being recognized to the Manager-Generating Stations-Nuclear.

Members of my staff and our Health Physics Program consultant will be available to discuss this organizational realignment at your convenience.

Very truly yours,

Ivan R. Finfrock, Jr.
Vice President
