OCT 29 1984

Washington Public Power Supply System  
Box 1223  
Elma, Washington 98541

Attention: Mr. G. C. Sorensen, Regulatory Programs Manager

Gentlemen:

Subject: QUALITY ASSURANCE PROGRAM DESCRIPTION FOR NUCLEAR PROJECT 3

By letter dated August 27, 1984 (G. C. Sorensen to J. B. Martin) the Washington Public Power Supply System submitted the current description of the QA Program for Design and Construction of Nuclear Project 3 (WNP-3).

Based on our evaluation of the changes introduced by Amendment 5, we find that the QA Program description for the design and construction of WNP-3 continues to satisfy the requirements of Appendix B to 10 CFR Part 50 and is therefore acceptable.

Should you have any questions regarding our review, please contact W. J. Wagner at (415) 943-3731.

Sincerely,

*D. F. Kirsch*

D. F. Kirsch, Acting Director  
Division of Reactor Safety and  
Projects
