Docket No. 50-537

CP

APPLICANTS' NOTIFICATION CONCERNING
SITE REDRESS

The United States Department of Energy and Project Management Corporation, for themselves and on behalf of the Tennessee Valley Authority (the Applicants), hereby file their Notification Concerning Site Redress.

1. On October 19, 1984, the Applicants filed their Motion to Dismiss Proceeding. That Motion requested termination of the existing Limited Work Authorization (LWA) and dismissal of the instant proceeding without prejudice, subject to the Applicants' plan for site redress as approved by the NRC Staff. On October 30, 1984, Intervenor Natural Resources Defense Council (NRDC) responded to Applicants' Motion and indicated that they did not oppose grant of the Motion. On November 8, 1984 the NRC Staff responded to the Motion and indicated that, in light of Applicants' clarification and confirmation of commitments in regard to site redress, the Staff did not oppose grant of the Applicants' Motion.

2. In order to keep the Board fully informed concerning matters affecting this proceeding, the Applicants are providing this notification concerning site redress. Applicants' near term planning for site redress is predicated upon commencing redress this spring at the earliest time that favorable weather conditions are expected to prevail, so that any necessary work can be completed before the onset of the unfavorable weather patterns that can be expected in the fall. To that end the Clinch River Breeder Reactor Plant (CRBRP) Project Office has scheduled procurement activities for site redress as follows:

- February 25, 1985 - Request for bids issued on redress work contract
- April 2, 1985 - Bid opening
- April 15, 1985 - Contract Award
- April 26, 1985 - Performance bonds posted
- May 1, 1985 - Commence redress work

In view of the fact that the Motion to Dismiss Proceeding is unopposed, the Project Office has determined that the scope of work in the request for bids would be defined in accordance with the site redress plan as approved by the Staff and as clarified and confirmed by the Applicants (see NRC Staff's Response to Applicants' Motion to Dismiss Proceeding, dated November 8, 1984). Pending a Board ruling on Applicants' Motion, the CRBRP Project Office intends to proceed with procurement activities as given above and at the risk that

Board action might affect the aforementioned scope of work and might necessitate reissuance of requests for bids.

Respectfully submitted,

George L. Edgar
