**ENFORCEMENT AND LICENSING ACTIONS RESULTING FROM INSPECTOR'S
EVALUATION AND RO REPORT 50-219/73-03**

In accordance with the request contained in your memorandum of August 13, 1973, I have attached Dr. Gallina's comments on Mr. Higginbotham's memo of August 7, 1973.

The subject Environmental Inspection, and related documentation, has received extensive examinations by various personnel within Regulatory, within the Licensee's organization, and by the Press. It appears to me that Region I's efforts reflect technical competence and administrative excellence by Dr. Gallina and the Environmental Staff. In the big picture, the inspection effort reflects credit on Regulatory. It is unfortunate that this high caliber effort was complicated by the inadvertent release by the Directorate of Licensing of the Evaluation memorandum. I consider Dr. Gallina's comments to be appropriate and candid - noting in particular that there are many cases in which short, concise inspection reports are not appropriate.

It is hoped that this issue is now considered to be administratively resolved, and that concerned personnel clearly remember the high caliber inspection and that areas of concern appear to have been adequately responded to.
