

**From:** Clayton Pittiglio  
**To:** FSV *Docket 50-267*  
**Date:** 3/27/96 1:39pm  
**Subject:** FSV Weekly Call, wednesday, March 27, 1996

**Commitments**

NRC stated that additional questions related to the "Embedded Piping" approach would be sent within the next week, and the letter may also approve the FSV dose assessment. . NRC also committed to fax a copy of the ORISE report related to the shielded versus unshielded measurements.

**Plant Status**

Major decontamination work continues in the PCRV area. Several different crews are currently working in this area. In addition, characterization survey work continues in the Reactor Building.

**Final Survey**

Work continues on the Final Survey. PSC stated that they are currently addressing the action items identified during the March 18-22, 1996, NRC inspection, and would be submitting responses in the next week. This includes a definition of the "Release Records" and "Survey Packages". The first phase of the final survey may be delayed for a couple of weeks.
