Directorate of Regulatory Operations, Region I

RO INSPECTION REPORT NO. 50-219/73-10  
JERSEY CENTRAL POWER & LIGHT CO.  
OYSTER CREEK

It appears to me that the plant has changed their attitude toward procedures and I feel that Supervision is being responsive to our comments.

According to <sup>any</sup> copy of the refueling procedure (No. 212), the "Refueling Work List" was not properly approved; however, when I questioned the approval, the station showed me a temporary procedure change assigning this responsibility to the Technical Supervisor. His people are responsible for the fuel management, and are the only ones that know what specific moves are required. I was satisfied with their method of approval.
