Kansas Gas and Electric Company
ATTN: Mr. Glenn L. Koester
Vice President-Nuclear
Post Office Box 208
Wichita, Kansas 67201

Gentlemen:

This refers to the inspection conducted by Messrs. W. G. Guldemon and H. F. Bundy of this office during the period December 1 to 15, 1984, of activities authorized by NRC Construction Permit No. CPPR 147, for the Wolf Creek Generating Station and to the discussion of our findings with Messrs. C. C. Mason, F. T. Rhodes, and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included IE Bulletin and Circular followup; followup of 10 CFR 50.55(e) reports; preoperational test procedure review; preoperational test activities; plant tours; maintenance activities; emergency procedures; and event followup. Within these areas, the inspection consisted of a selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The findings are documented in the enclosed report.

We also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Within the scope of the inspection, no violations or deviations were identified. Two unresolved items are identified in paragraph 4 of the enclosed inspection report. Ten open items are identified in paragraphs 4, 5, and 6 of the enclosed report.
