Gentlemen:

This refers to the inspection conducted by D. L. DuBois of this office during the period November 13-16, 1984, of activities authorized by NRC Operating License DPR-46 for the Cooper Nuclear Station, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included surveillance of station batteries. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documents in the enclosed inspection report.

During this inspection, it was found that certain activities under your license appeared to be in violation of NRC requirements. The violations reported in paragraph 2 of the enclosed inspection report were forwarded to you by our letter and Notice of Violation, dated February 13, 1985; therefore, this letter does not require further written response.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
E. H. Johnson

E. H. Johnson, Chief
Reactor Project Branch 1
