Gentlemen:

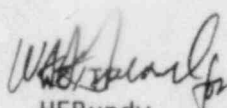

This refers to the inspection conducted by Messrs. W. G. Guldmond and H. F. Bundy of this office during the period December 16-31, 1984, of activities authorized by NRC Construction Permit No. CPPR 147, for the Wolf Creek Generating Station and to the discussion of our findings with Messrs. C. C. Mason, F. T. Rhodes, and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included plant tours, maintenance activities, maintenance procedures, off-normal procedures, preoperational test activities, employee concerns, IE Information Notice 84-84, event followup, and independent inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The findings of this inspection are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified. One unresolved item is identified in paragraph 5a of the enclosed inspection report. Four open items are identified in paragraphs 5, 6, 12, and 13 of the enclosed report.

We also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.
