

February 12, 1985

Docket No. 50-416

Mr. J. B. Richard  
Senior Vice President, Nuclear  
Mississippi Power & Light Company  
P.O. Box 23054  
Jackson, Mississippi 39205

Dear Mr. Richard:

Subject: Compliance with License Condition 2.C.(19) in Grand Gulf  
Unit 1 Operating License NPF-29

The Mississippi Power & Light Company (MP&L) letter dated October 18, 1984, provided additional information needed by NRC staff to complete its review of the MP&L response to NRC Office of Inspection and Enforcement Information Notice 79-22 (IEN 79-22) "Qualification of Control Systems", September 14, 1979. License Condition 2.C.(19) requires that MP&L complete any design changes found necessary as a result of the staff's review of MP&L's response to IEN 79-22.

The NRC staff has completed its review of the MP&L response to IEN 79-22 and concludes that the analyses provided by MP&L demonstrate that with presently installed systems, in Grand Gulf Unit 1, the concerns expressed in IEN 79-22 will not result in an unreviewed safety concern. Accordingly, design changes are not necessary, and License Condition 2.C.(19) in Operating License NPF-29 has been satisfied. The staff's safety evaluation is enclosed.

Sincerely,

/s/  
Thomas M. Novak, Assistant Director  
for Licensing  
Division of Licensing

Enclosure:  
As stated
