VOGTLE ELECTRIC GENERATING PLANT - UNITS 1 AND 2
PROPRIETARY TORNADO LOAD ANALYSIS CALCULATION

Dear Mr. Denton:

In our response to NRC Question 220.4, submitted in Amendment 8 to the Vogtle Electric Generating Plant, Units 1 and 2 FSAR, we stated that an example of the requested design calculations, covering the controlling tornado load combinations, would be provided in the structural design reports. Due to their proprietary nature we are submitting three (3) sets of these calculations herewith separately from the design reports.

Also enclosed is one (1) Application for Withholding, B0-78. As the enclosed calculations contain information proprietary to the Bechtel Power Corporation, they are supported by an affidavit signed by an officer of the Bechtel Power Corporation, the owner of the information. The affidavit sets forth the basis on which the information may be withheld from public disclosure by the Commission and addresses, with specificity, the considerations listed in paragraph (b)(4) of Section 2.790 of the Commission's regulations.

Accordingly, it is respectfully requested that the information which is proprietary to Bechtel be withheld from public disclosure in accordance with 10 CFR Section 2.790 of the Commission's regulations. Correspondence with respect to the proprietary aspects of the Application for Withholding or the supporting Bechtel affidavit should reference B0-78 and should be addressed to:

Mr. Martin Malcom
Project Engineering Manager
