

NUCLEAR REGULATORY COMMISSION  
[Docket Nos. 50-352, 50-353]

PHILADELPHIA ELECTRIC COMPANY  
(Limerick Facility)

Request for Action Under 10 CFR 2.206 Regarding  
Continued Operation At The Limerick Facility

Notice is hereby given that, by a Petition dated December 23, 1984, R. L. Anthony and Friends of the Earth (Petitioners) requested that the Nuclear Regulatory Commission institute proceedings by issuing an order to show cause to the Philadelphia Electric Company (Licensee) why License No. NPF-27 for its Limerick Facility should not be revoked. The Petition bases its request for license revocation upon four concerns, namely; that exemptions granted with the issuance of License No. NPF-27 were improperly granted and consequently continued operation raises public health and safety concerns; that Licensee Event Reports filed since the issuance of the License demonstrate that continued operation of the facility is unsafe; that NRC Inspection Reports and correspondence between the NRC and the Licensee further indicate deficiencies at the facility requiring license revocation; and that the Independent Design Verification Program conducted for the facility was insufficient to provide assurance of safe operation under License No. NPF-27.

The Petition is being treated pursuant to 10 CFR 2.206 of the Commission's regulations and accordingly appropriate action will be taken on the request within a reasonable time. A copy of the Petition is available for inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, DC 20555 and at the local document room for the Limerick facility located at the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Dated at Bethesda, Maryland, this 13th day of February 1985.
