MEMBER OF THE
General  Public Utilities Corporation

September 27, 1974

Mr. Paul F. Collins, Chief
Operator Licensing Branch
Directorate of Licensing
United States Atomic Energy Commission
Washington, D. C. 20545

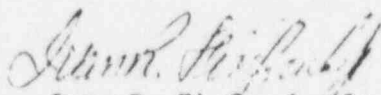

Dear Mr. Collins:

Subject: Oyster Creek Station
Docket No. 50-219
Operator Requalification Program

Your letter of June 3, 1974 requested revisions in the Oyster Creek Nuclear Generating Station's Operator Requalification Program. My response to the various areas you identified for revision in this letter was forwarded to you on July 5, 1974. Discussions between the Oyster Creek Nuclear Station's staff and your staff occurred subsequent to my July 5, 1974 letter to clarify and resolve any remaining questions. The results of these discussions and the revisions are incorporated in the revised Oyster Creek Nuclear Generating Station's Operator Requalification Program dated September 1974.

One signed original and thirty-nine copies of this document are enclosed.

Very truly yours,

Ivan R. Finfrock, Jr.
Vice President
