Gentlemen:

Enclosed for your information and implementation is a revised schedule for our review of your application for conversion of Provisional Operating License No. DPR-16 to a Full-Term Operating License for the Oyster Creek Nuclear Station.

Some of these events require preparation and participation or input by you, such as responses to our positions, proposed changes to the technical specifications, and ACRS meetings. For this reason, we believe that you should carefully review this revised schedule to determine whether you believe that the dates are realistic or should be adjusted. If you believe further adjustments need to be made, please advise us, so that a suitable revised schedule can be developed.

Sincerely,

Original signed by:
