

VZB-L

Jersey Central Power & Light Company

MADISON AVENUE AT PUNCH BOWL ROAD • MORRISTOWN, N. J. 07960 • 201-539-6111

September 11, 1974

Mr. A. Giambusso
Deputy Director for Operating Reactors
Directorate of Licensing
United States Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Giambusso:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Anticipated Transients Without Scram

This is to advise you that our submittal on the subject item will be delayed. Jersey Central Power & Light Company has been advised by the General Electric Company that the Common Mode Failure Analysis applicable to the Oyster Creek facility will not be available to us until October 1, 1974. We will require one month from the receipt of the General Electric topical report to perform the necessary engineering and management reviews. We propose to submit our report to you by November 1, 1974.

The General Electric Company has also advised us that the results of the Primary System Transient Analysis and the Containment Analysis for the Oyster Creek facility will not be available until March of 1975. We propose to submit these results to you after completing our timely review.

Very truly yours,

Ivan R. Finfrock, Jr.
Ivan R. Finfrock, Jr.
Vice President
