OYSTER CREEK ENVIRONMENTAL TECHNICAL SPECIFICATIONS

Environmental issues at the Oyster Creek facility were the subject of a prior request for action. (Reference - FO 323). We recognize that environmental issues at this facility are indeed complex, and appropriately entail extensive DL effort regarding resolution.

We also believe, however, that HQ action and a rapid response to our original request is required. It is our view that the environmental impact on the area and the public's attentiveness to this issue warrants pursuing changes in the blue book schedule, if necessary, to assure that Environmental Technical Specifications are issued in 1974.

J. P. O'Reilly
 Director
