

Oyster Creek (DN 50-219)

MEMO TO FILE THRU D. L. CAPTON, SENIOR REACTOR INSPECTOR

Two separate telephone calls were received from State of New Jersey representative as follows:

- (1) John Russo - Department of Radiation Protection on 5/30/74.
- (2) Charles Amato - currently on a leave of absence and contacted by State of New Jersey for follow up on 5/31/74.

Subject of discussion was penetration failure at Oyster Creek. A Commissioner (Bardine) was concerned about the leakage. The State was misinformed and under the impression that O.C. shutdown on 5/29/74 as a result of the failure. I turned this around and discussions were ended low key.
