

Docket No. 50-322

FEB 14 1985

Mr. John D. Leonard, Jr.
Vice President - Nuclear Operations
Long Island Lighting Company
Shoreham Nuclear Power Station
P.O. Box 18, North Country Road
Wading River, New York 11792

Dear Mr. Leonard:

SUBJECT: Solid Waste Process Control Program - Shoreham Nuclear Power Station

By letter dated December 21, 1984 (SNRC-1126), the Long Island Lighting Company submitted the revised Solid Waste Process Control Program (PCP) (Revision 0), dated December 18, 1984, for the Shoreham Nuclear Power Station. The revised PCP incorporates NRC staff comments that were forwarded to you on September 12, 1984.

The NRC staff has reviewed the revised PCP and has determined that it is acceptable and satisfies the requirements of condition C.(15) of the Shoreham license. You may therefore commence processing of solid waste in accordance with the provision of the revised PCP. However, you should note that this approval is granted on an interim basis. The NRC staff is in the process of evaluating PCPs at nuclear power plants on a generic basis, and as part of that effort, the Shoreham PCP will be reviewed again in the future by an NRC contractor. If you have any questions, contact Mr. R. Caruso (301-492-8392).

A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
