FEB 12 1985

Docket No. 50-461

Illinois Power Company
ATTN: Mr. W. C. Gerstner
Executive Vice President
500 South 27th Street
Decatur, IL 62525

Gentlemen:

This refers to the announced preoperational physical protection inspection conducted by Mr. G. L. Pirtle and Ms. G. M. Christoffer of this office on January 17-24, 1985, of activities at Clinton Power Station authorized by NRC Construction Permit No. CPPR-137 and to the discussion of our findings with Mr. J. Cook and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection. The enclosed report does contain certain findings which must be corrected and/or resolved prior to fuel load. These findings will be reviewed during future preoperational inspections. No written response is required at this time.

The inspectors noted that the June-September 1985 time frame is very demanding if your scheduled security program implementation date is to be achieved. Continued senior management review of the Integrated Security System Implementation Schedule appears warranted.

Areas examined during this inspection concern a subject matter which is exempt from disclosure according to Section 73.21(c)(2) of the NRC's "Rules of Practice," Part 73, Title 10, Code of Federal Regulations. This information must be handled and protected in accordance with the provisions of 10 CFR 73.21. Consequently, our report of this inspection will not be placed in the Public Document Room.
