July 25, 1974

Mr. William H. Regan, Jr., Chief  
Environmental Projects Branch #4  
Directorate of Licensing  
United States Atomic Energy Commission  
Washington, D. C. 20545

Dear Mr. Regan:

Subject: Oyster Creek Station  
Docket No. 50-219  
Costs of Condenser Cooling Water  
System Alternatives

Reference: Your letter dated July 10, 1974

Your letter of July 10, 1974, which was received on July 16, 1974, requested updated cost data for condenser cooling water system alternatives by July 26, 1974. You also asked that if this information could not be provided by July 26, an alternative date be forwarded.

A concerted effort has been made to compile these data by the July 26 date. However, we find it necessary to request a ten-day extension to August 5, 1974 for the completion of this analysis.

Your cooperation is appreciated.

Very truly yours,

*Ivan R. Finfrock, Jr.*
