February 26, 1974

Note to File

Mr. Finfrock, Jersey Central Power & Light Company, called me at 1:30 PM, February 25, 1974. Apparently, the President of GPU received a call from Mr. North, calling for the President of General Electric Company. Mr. North told the President of GPU that the Deputy Minister for Electrification and Energetics, Mr. Moltzev, Russia, wanted to visit a Nuclear Power Plant and Jersey Central in particular in the near future - in the next day or two. The President of GPU said it was okay with him if it was okay with the AEC AND if he had reasonable notice (perhaps 24 hours).

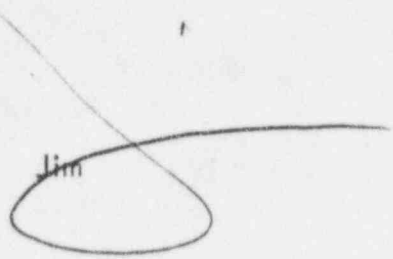

Mr. Finfrock said that they planned to go ahead, but they wanted us to know. I asked him to inform me if they have a firm schedule - he said he would.

I informed Dreher at 2:00 PM, 2/25/74, of what was going on. I asked him to let me know if he has a problem.
