SUBJECT MEETINGS RELATING TO INSPECTIONS CONDUCTED AT OYSTER CREEK
DOCKET NO. 50-219

Jersey Central Power and Light Company has committed to corporate attendance (D. A. Ross and R. Ivan Pinfrock) at all RO inspection exit interviews. A review of recent inspections has shown a trend for more and more telephone exit meetings being conducted with the above named corporate level representatives. It is our view that corporate level contacts be maintained, however, it is our preference that these contacts be maintained in person. On most inspections these interviews should be held either at the site or at the corporate offices if the above named corporate representatives should not be available to attend the meeting at the site. If the inspector concludes that a telephone interview would suffice, the inspector is requested to refer this matter to Regional management so that Regional decision may be made. The matter of maintaining uniformity on a Regional level relative to licensee corporate commitments to the region is considered an important matter. You are requested to give this matter your close attention in all future inspections conducted at Oyster Creek.

Should you have any questions relative to this subject, please contact me.
