

Docket: 50-298

NOV 09 1984

Nebraska Public Power District
ATTN: J. M. Pilant, Manager, Technical
Staff-Nuclear Power Group
P. O. Box 499
Columbus, Nebraska 68601

Gentlemen:

Enclosed is Federal Emergency Management Agency (FEMA), Region VII, Final Exercise Evaluation Report for the joint radiological emergency preparedness exercise conducted May 15 and 16, 1984, for the Cooper Nuclear Station.

There were Category B deficiencies observed during the exercise; however, the deficiencies did not detract from the overall demonstrated capability that, in the event of an actual emergency, measures could be taken to protect the health and safety of the public. A schedule for correcting the deficiencies will be given to the states by FEMA. It is requested that you coordinate with the appropriate states to assure correction of these deficiencies in a timely manner.

If you have any questions, please contact this office.

Sincerely,

Original Signed By
E. H. Johnson

E. H. Johnson, Chief
Reactor Project Branch 1
